

What we offer

With over 300 locations, we ensure that building and operating materials, as well as construction-related services, are always available where they are needed. Our network spans large parts of Europe, guaranteeing our customers short delivery times, reliable availability and consistently high quality. In addition, we also offer selected services internationally on request.

Products & Services

Concrete

roxit provides concrete solutions for every construction site. You receive standard-compliant concrete, as well as consultancy, logistics and quality assurance, all from a single source. Our Europe-wide network of mixing plants ensures rapid availability and short transport distances. This enables us to guarantee a reliable and efficient supply.

Available in the following countries:

AT, CZ, DE, HR, HU, PL, RO, SK

Bitumen trading

roxit is your partner for bitumen and binders in road construction. We provide a comprehensive range of bitumen solutions, including polymer-modified bitumen (PMB), which is produced in our own plants throughout Europe and delivered on time. Thanks to our own hazardous goods logistics, we ensure a reliable and compliant supply to the asphalt and road construction industry during every stage of a project. Our focus is on availability, quality and secure delivery.

Available in the following countries:

AT, BG, CZ, DE, HR, HU, ME, PL, RO, RS, SI, SK

Bitumen emulsion, jointing, milling, recycling

roxit specialises in the sustainable maintenance of traffic areas. Our approach follows the principle: maintenance before new construction. We produce and process bitumen emulsions and specialist products for road maintenance and construction. Our services include processes such as surface treatments, pre-spraying, milling, jointing work, and recycling solutions. This enables us to extend the service life of roads efficiently and with minimal disruption.

Available in the following countries:

AT, CZ, DE, HR, HU, PL, RO, SK

Stone & Gravel

roxit supplies stone and gravel of certified quality. Our locally sourced materials comply with standards and can be used for a variety of purposes. We provide reliable delivery services and short transport routes. We also support you in selecting and integrating materials into your construction processes.

Available in the following countries:

AT, BG, CZ, HR, HU, ME, PL, RO, RS, SI, SK

Mobile concrete mixing plants

roxit brings concrete production directly to your construction site with its mobile mixing plants. We plan and operate these plants for large-scale projects worldwide. This provides you with a continuous and independent on-site concrete supply, which ensures efficiency and stability throughout the construction process.

Available in the following countries:

Internationally on request

Sustainable building systems

roxit develops and manufactures innovative panels made from renewable materials, such as hemp and flax. Our product range includes insulation and building systems, acoustic solutions, green roofs and noise barriers. Our solutions enable energy-efficient and resource-conserving construction and renovation. At the same time, they significantly enhance acoustic performance and urban quality of life. In doing so, they actively contribute to reducing CO₂ emissions.
