

What we offer

With over 300 locations, we ensure that building materials, consumables and construction-related services are always available where they are needed. Our network spans large parts of Europe and guarantees short delivery times, high availability and consistently high quality for our customers. In addition, we also offer selected services internationally on request.

Products & Services

Concrete

roxit provides concrete solutions for every construction site. You receive standard-compliant concrete combined with consultancy, logistics and quality assurance from a single source. Our Europe-wide network of mixing plants ensures short transport distances and rapid availability. This is how we guarantee a reliable and efficient supply.

Available in the following countries:

AT, CZ, DE, HR, HU, PL, RO, SK

Bitumen trading

roxit is your partner for bitumen and binders in road construction. We supply the full range of bitumen solutions – including polymer-modified bitumen (PMB), which we produce in our own plants – across Europe and on time. Thanks to our own hazardous goods logistics, we ensure a reliable and compliant supply to the asphalt and road construction industry throughout all project phases. Our focus is on availability, quality and secure delivery.

Available in the following countries:

AT, BG, CZ, DE, HR, HU, ME, PL, RO, RS, SI, SK

Bitumen emulsion, joints, milling, recycling

roxit specialises in the sustainable maintenance of traffic areas. Our approach follows the principle: maintenance before new construction. We produce and process bitumen emulsions as well as specialist products for road maintenance and road construction. Our range of services includes processes such as surface treatments, pre-spraying, milling and jointing work, as well as recycling solutions. In this way, we extend the service life of roads efficiently and with minimal disruption.

Available in the following countries:

AT, CZ, DE, HR, HU, PL, RO, SK

Stone & Gravel

roxit supplies you with stone and gravel materials of certified quality. Our materials are sourced locally, comply with standards and are versatile in application. We offer reliable delivery and short transport routes. In addition, we support you in selecting materials and integrating them into your construction processes.

Available in the following countries:

AT, BG, CZ, HR, HU, ME, PL, RO, RS, SI, SK

Mobile concrete mixing plants

roxit brings concrete production directly to your construction site with mobile mixing plants. We plan and operate mobile mixing plants for large-scale projects worldwide. You receive a continuous and independent on-site concrete supply. This ensures efficiency and stability in the construction process.

Available in the following countries:

Internationally on request

Sustainable building systems

roxit develops and manufactures innovative panels from renewable raw materials such as hemp and flax. Our applications range from insulation and building systems, through acoustic solutions and green roofs, to noise barriers. Our solutions enable energy-efficient, resource-conserving construction and renovation. At the same time, they noticeably improve acoustic and urban quality of life. In doing so, they make an active contribution to reducing CO₂ emissions.
